

WEB3 • GAME-FI • SOCIAL-FI

DOGG

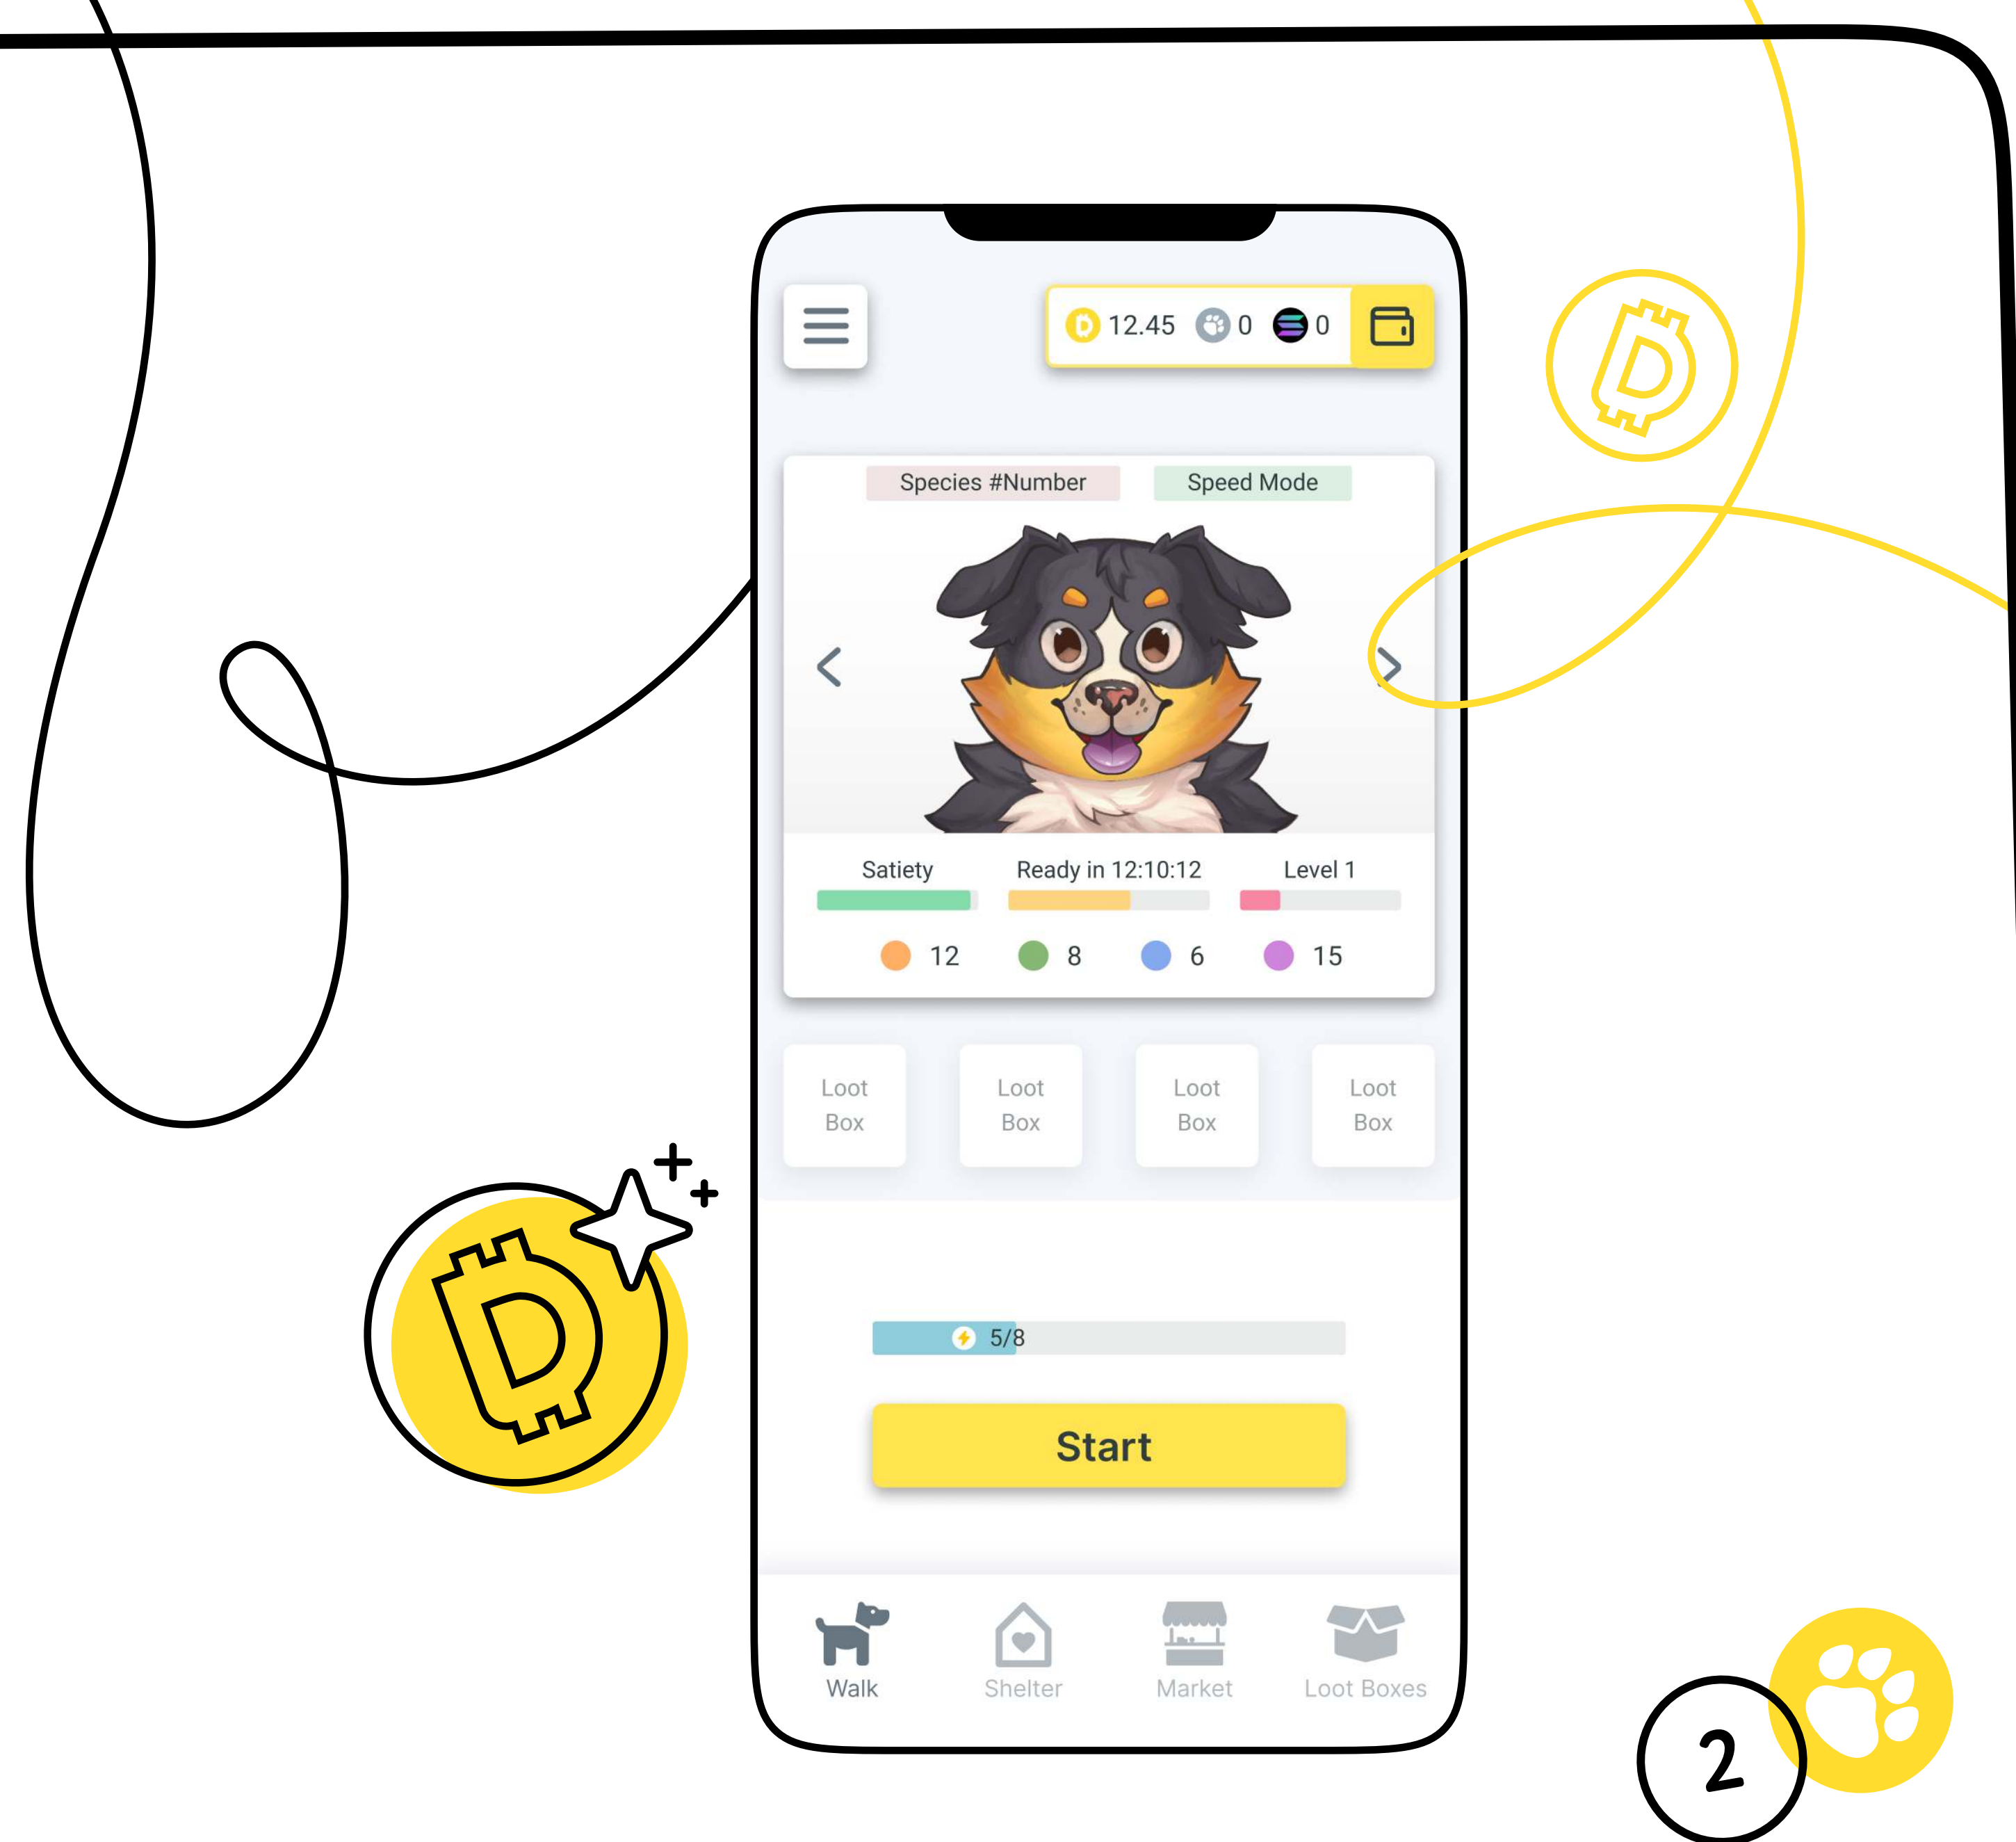

# WHAT IS DOGGO?

DogGo is a Web3 lifestyle app with the elements of Game-fi and De-fi

- 1 Users own NFT-dogs, which they can walk to earn tokens, as well as upgrade, train and mate with other dogs to create new ones.
- 2 Users can purchase, sell or rent dogs through the in-game marketplace.
- 3 Walking the dogs will give users in-game tokens that could be exchanged directly through the app.

Using the integrated wallet feature

# OUR MISSION

Now everyone can get a virtual pet and even earn money by walking!

## Healthy lifestyle for all

It is known for a long time that dog owners have lower heart disease rates, as well as other health benefits. It is often connected to the need to walk your pet.

## Low learning curve

Players don't have to buy NFTs to start earning money. Rent feature allows them to participate without initial investments!

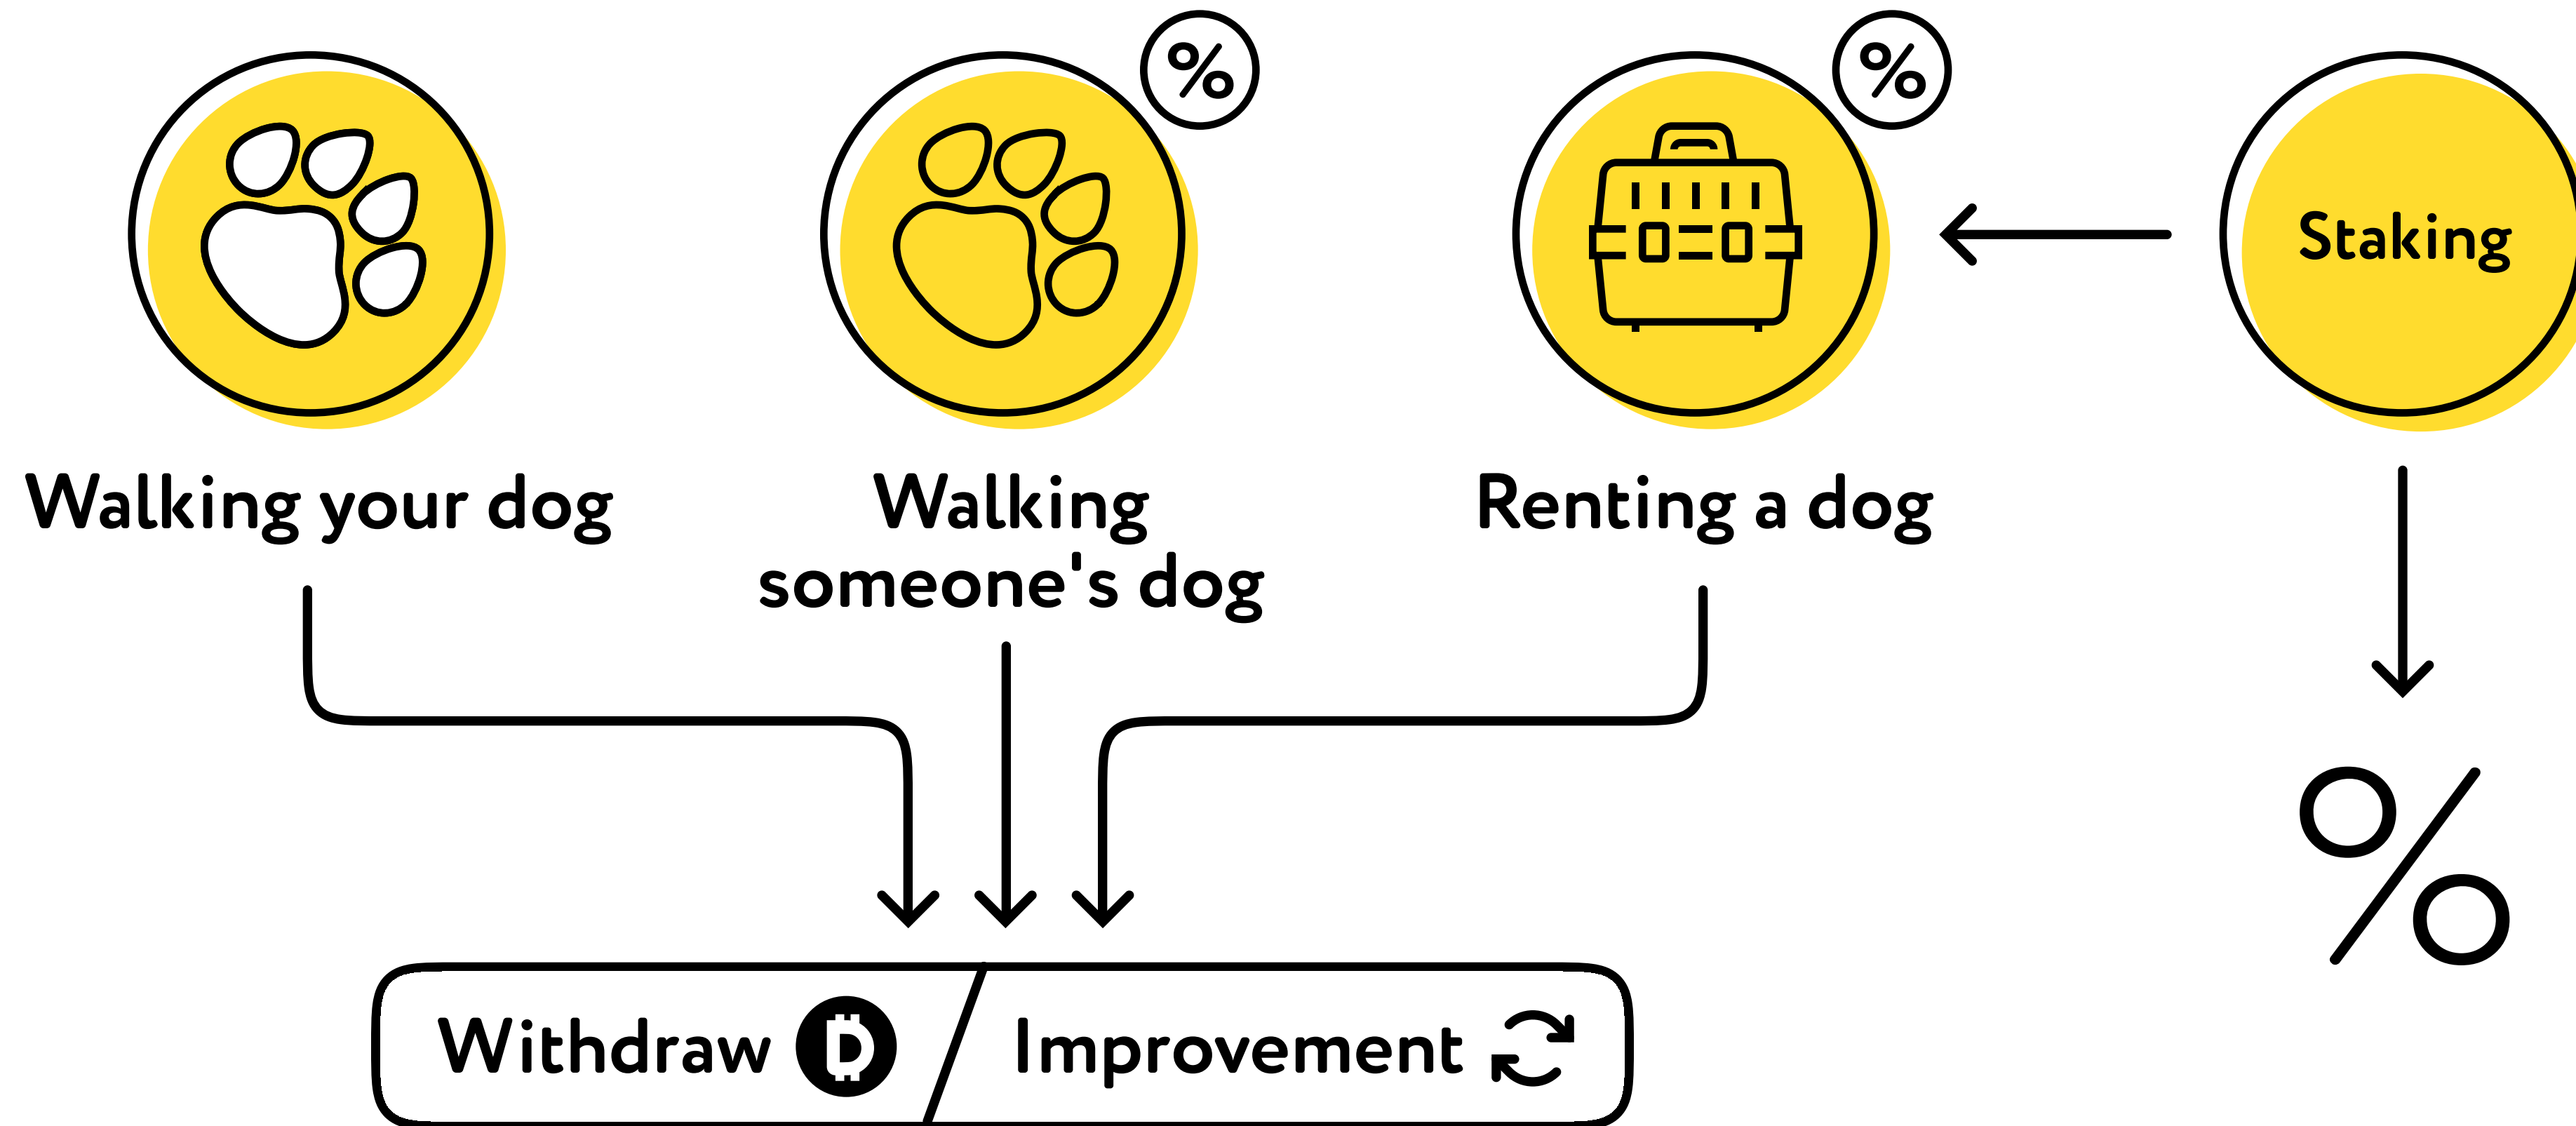

## Immersion into Web3

Players get familiar with Web3 technologies while playing. Widespread promotion of Web3 is an important part of our mission!

# TOKENOMICS

Tokenomics\* will be further detailed in a **white paper**

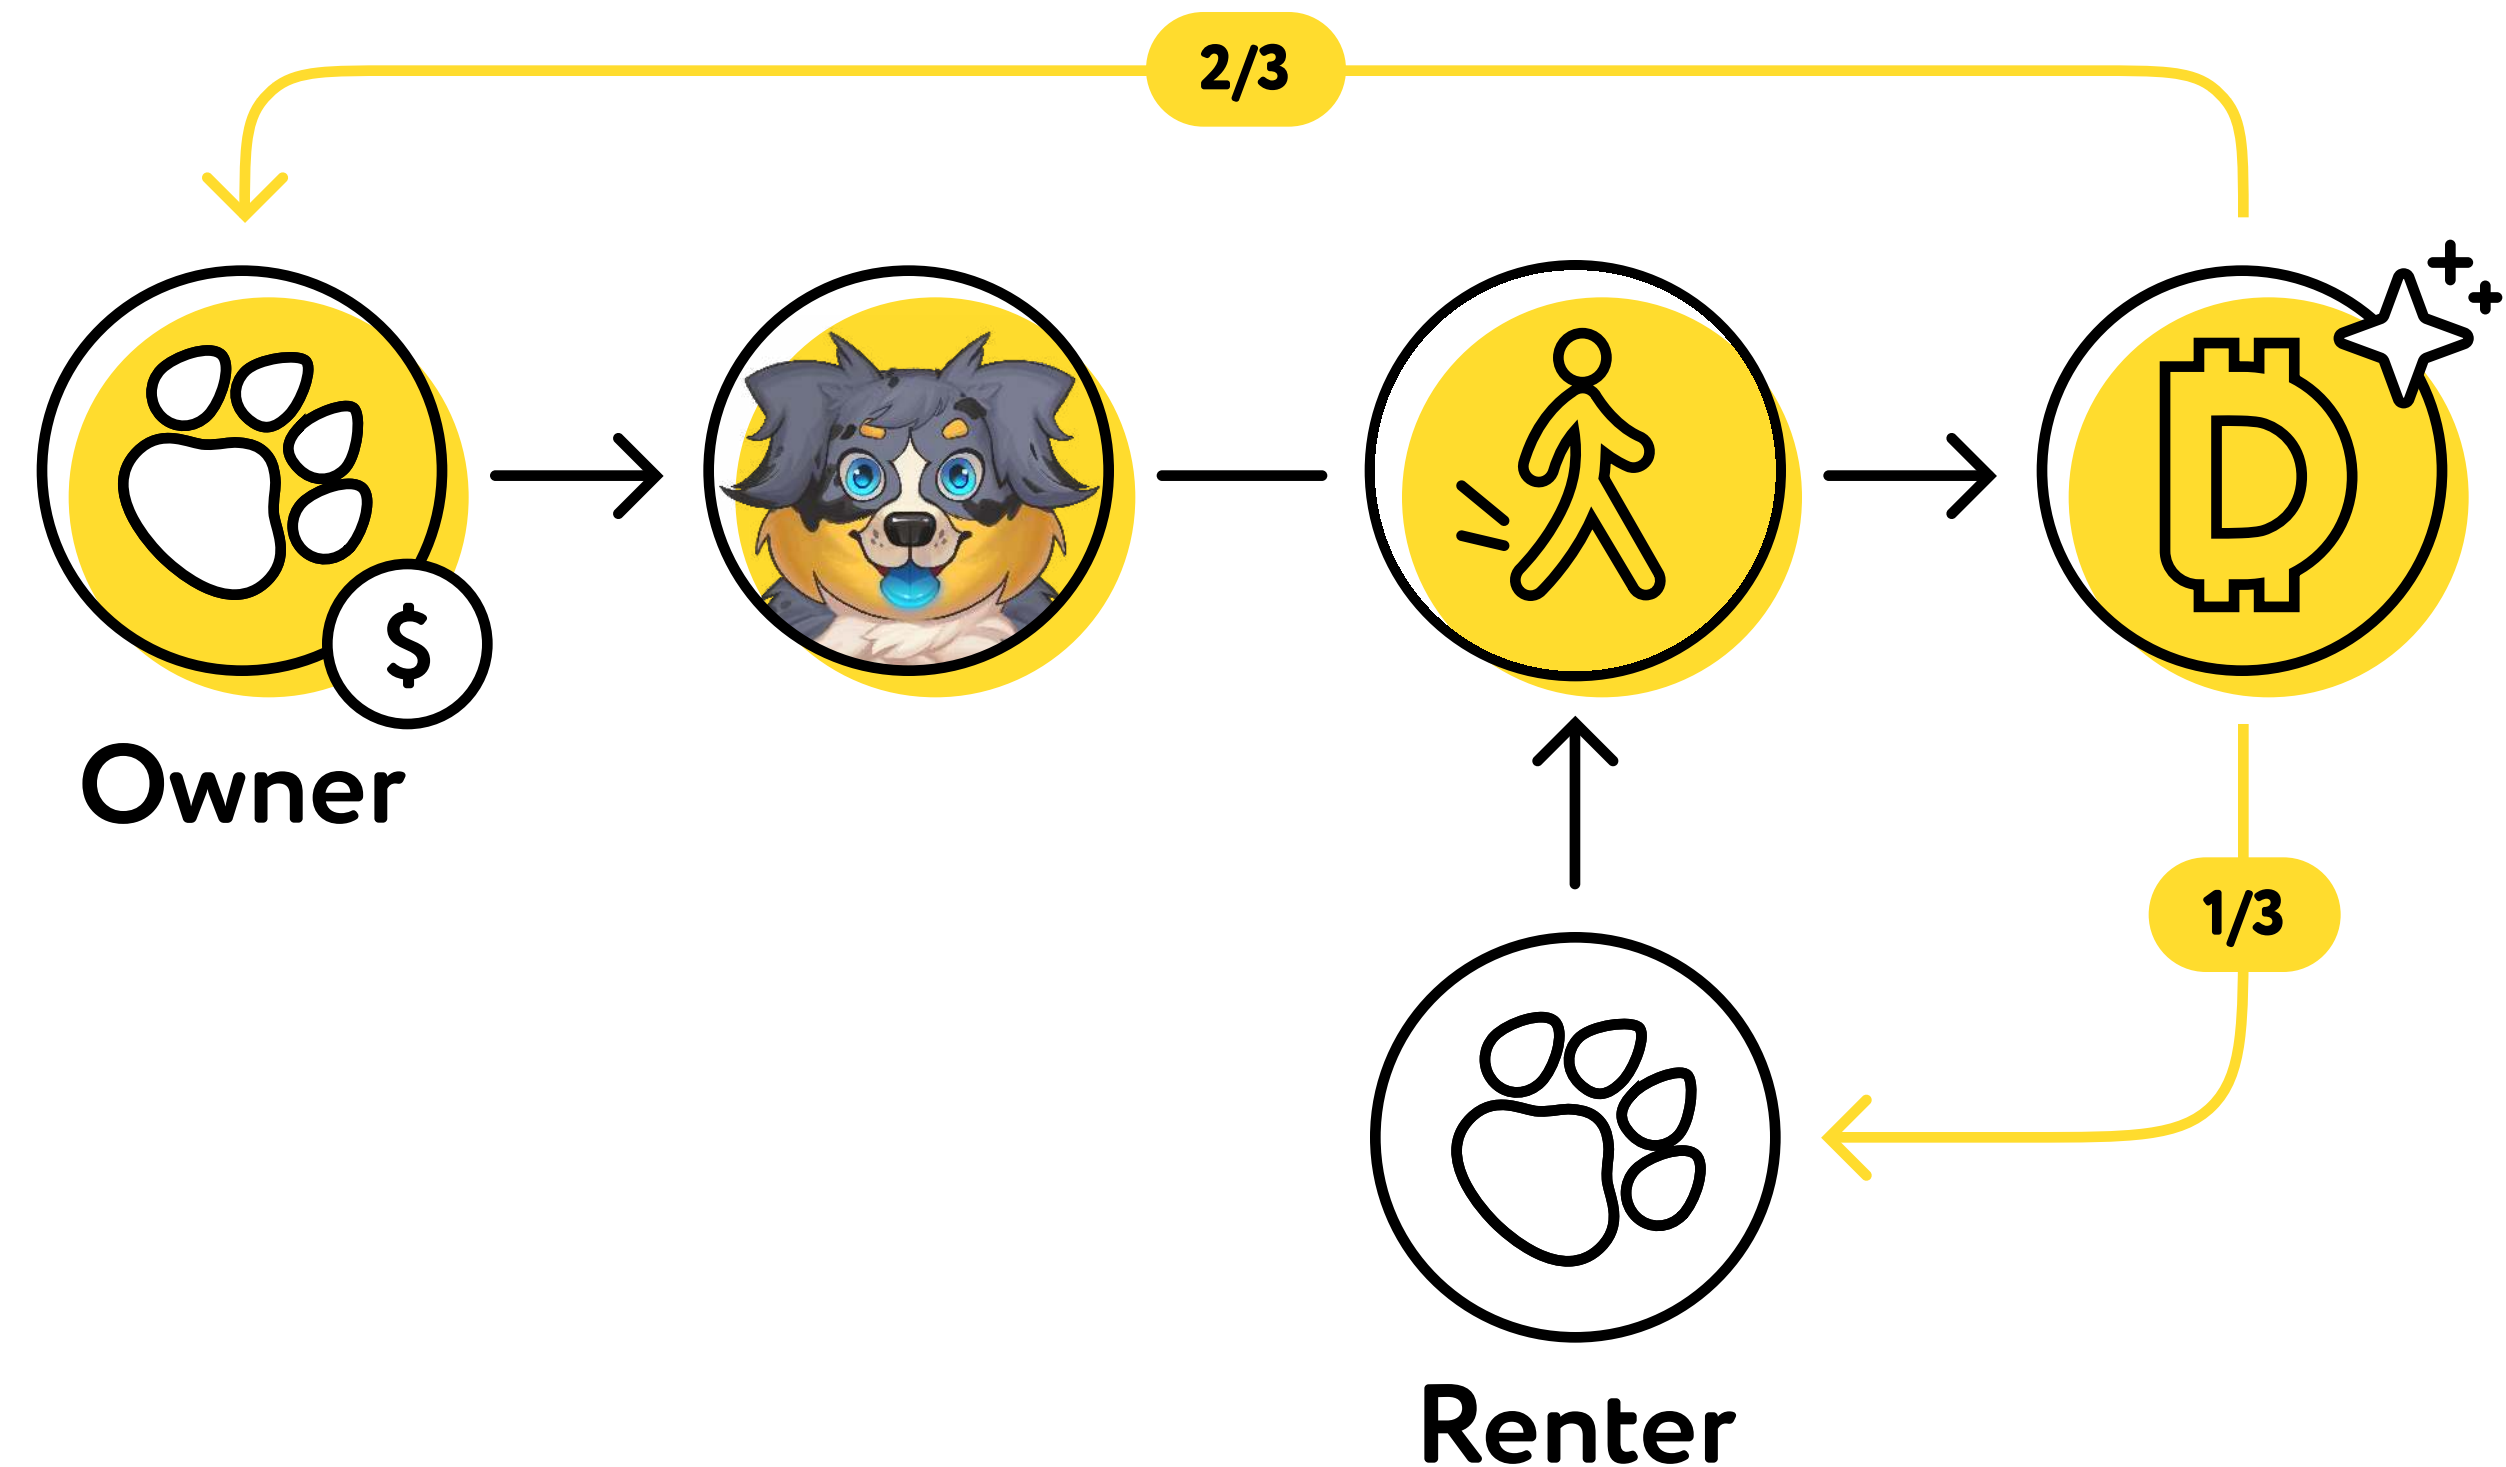

\* We receive a small percentage from users' in-game spendings

# BECOME THE OWNER OF A DOG SHELTER!

Users who own several dogs can share them with other users and get a major percentage from the tokens those users get for walking the dogs❖

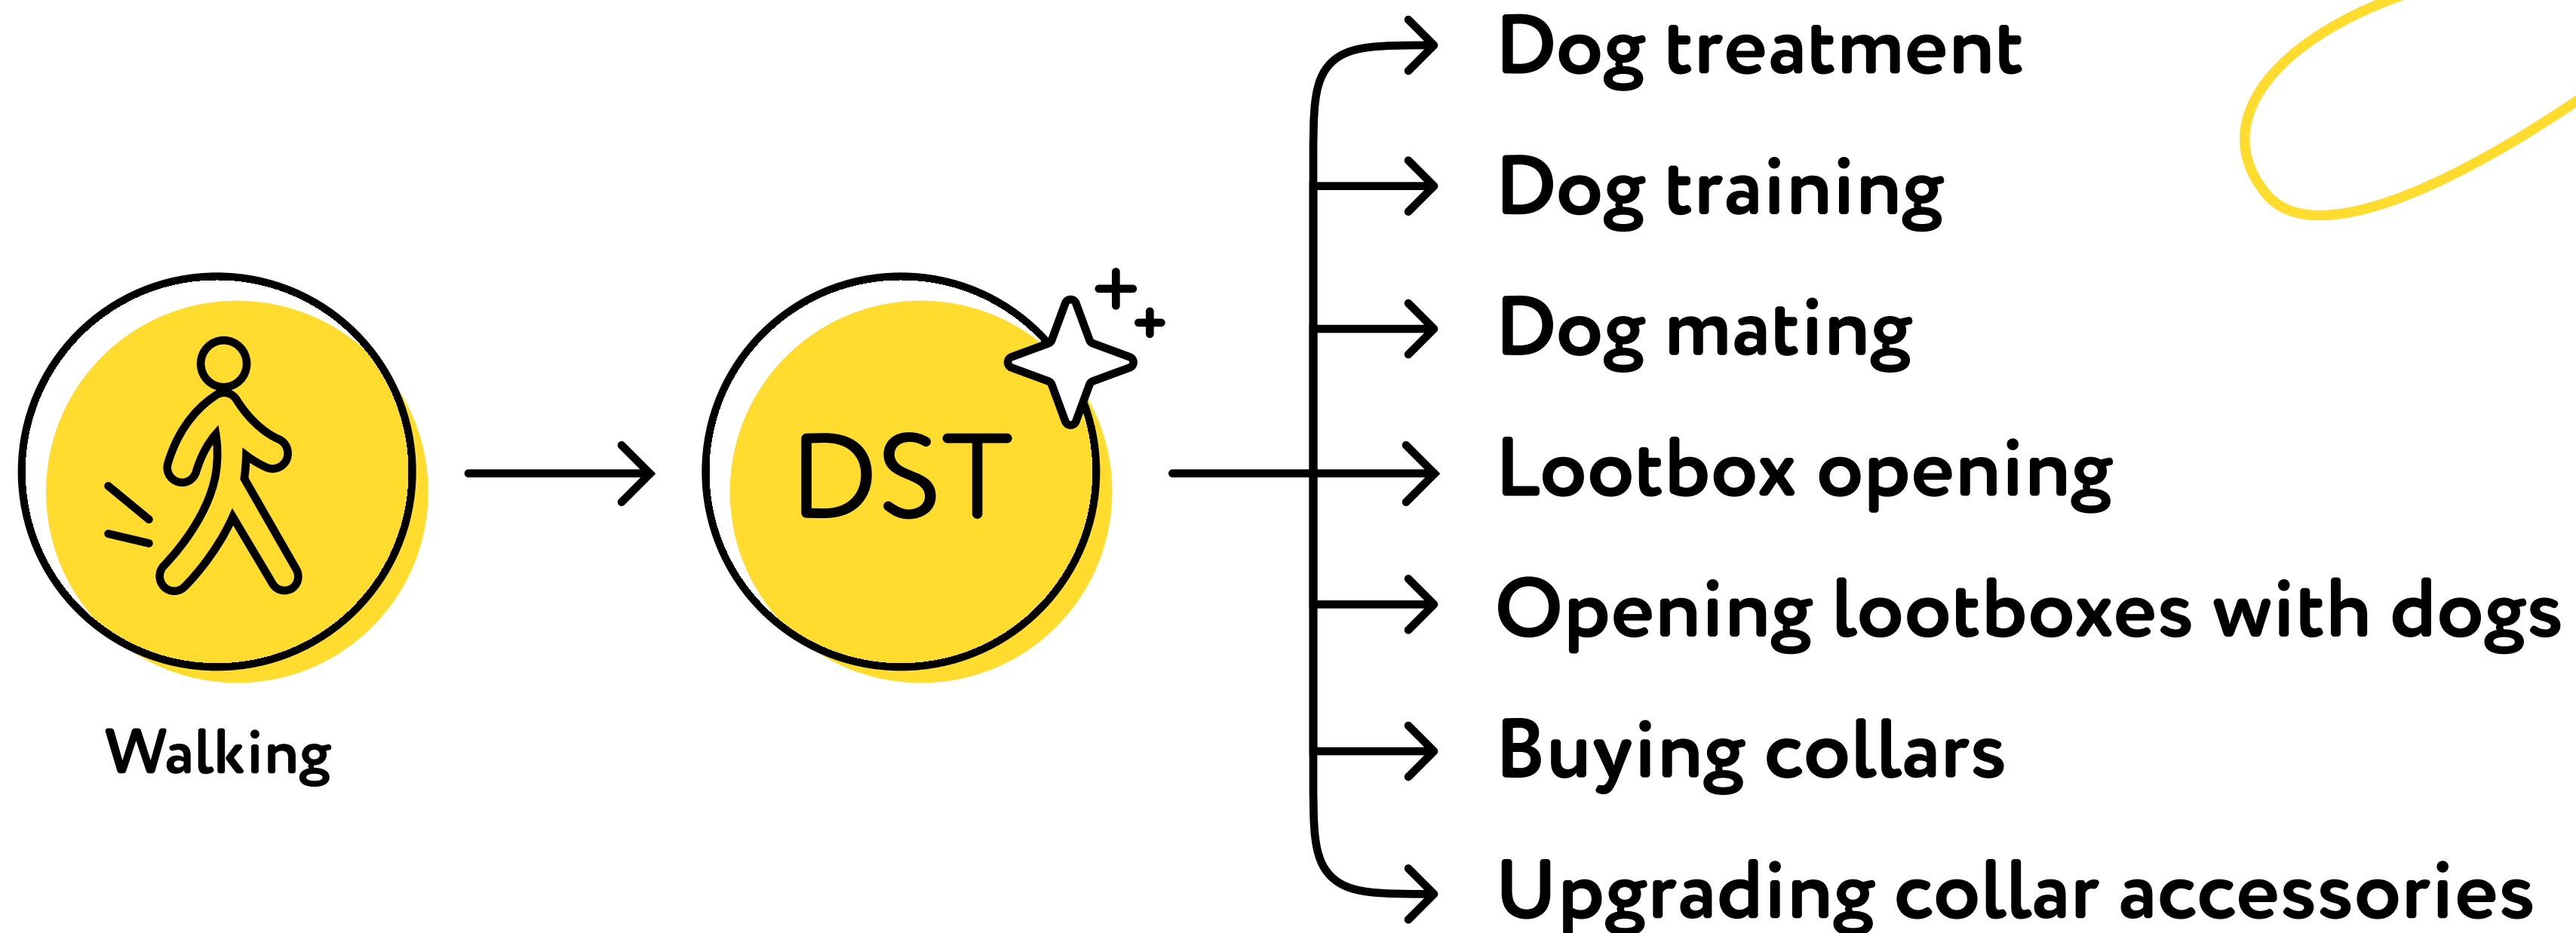

This is a great opportunity to earn more tokens without having to spend more time walking their dogs. For other players this creates an opportunity to become a part of Move-to-Earn without initial investments.

❖ To be able to share your dog with another player, the owner should freeze an amount of DHT as a staking

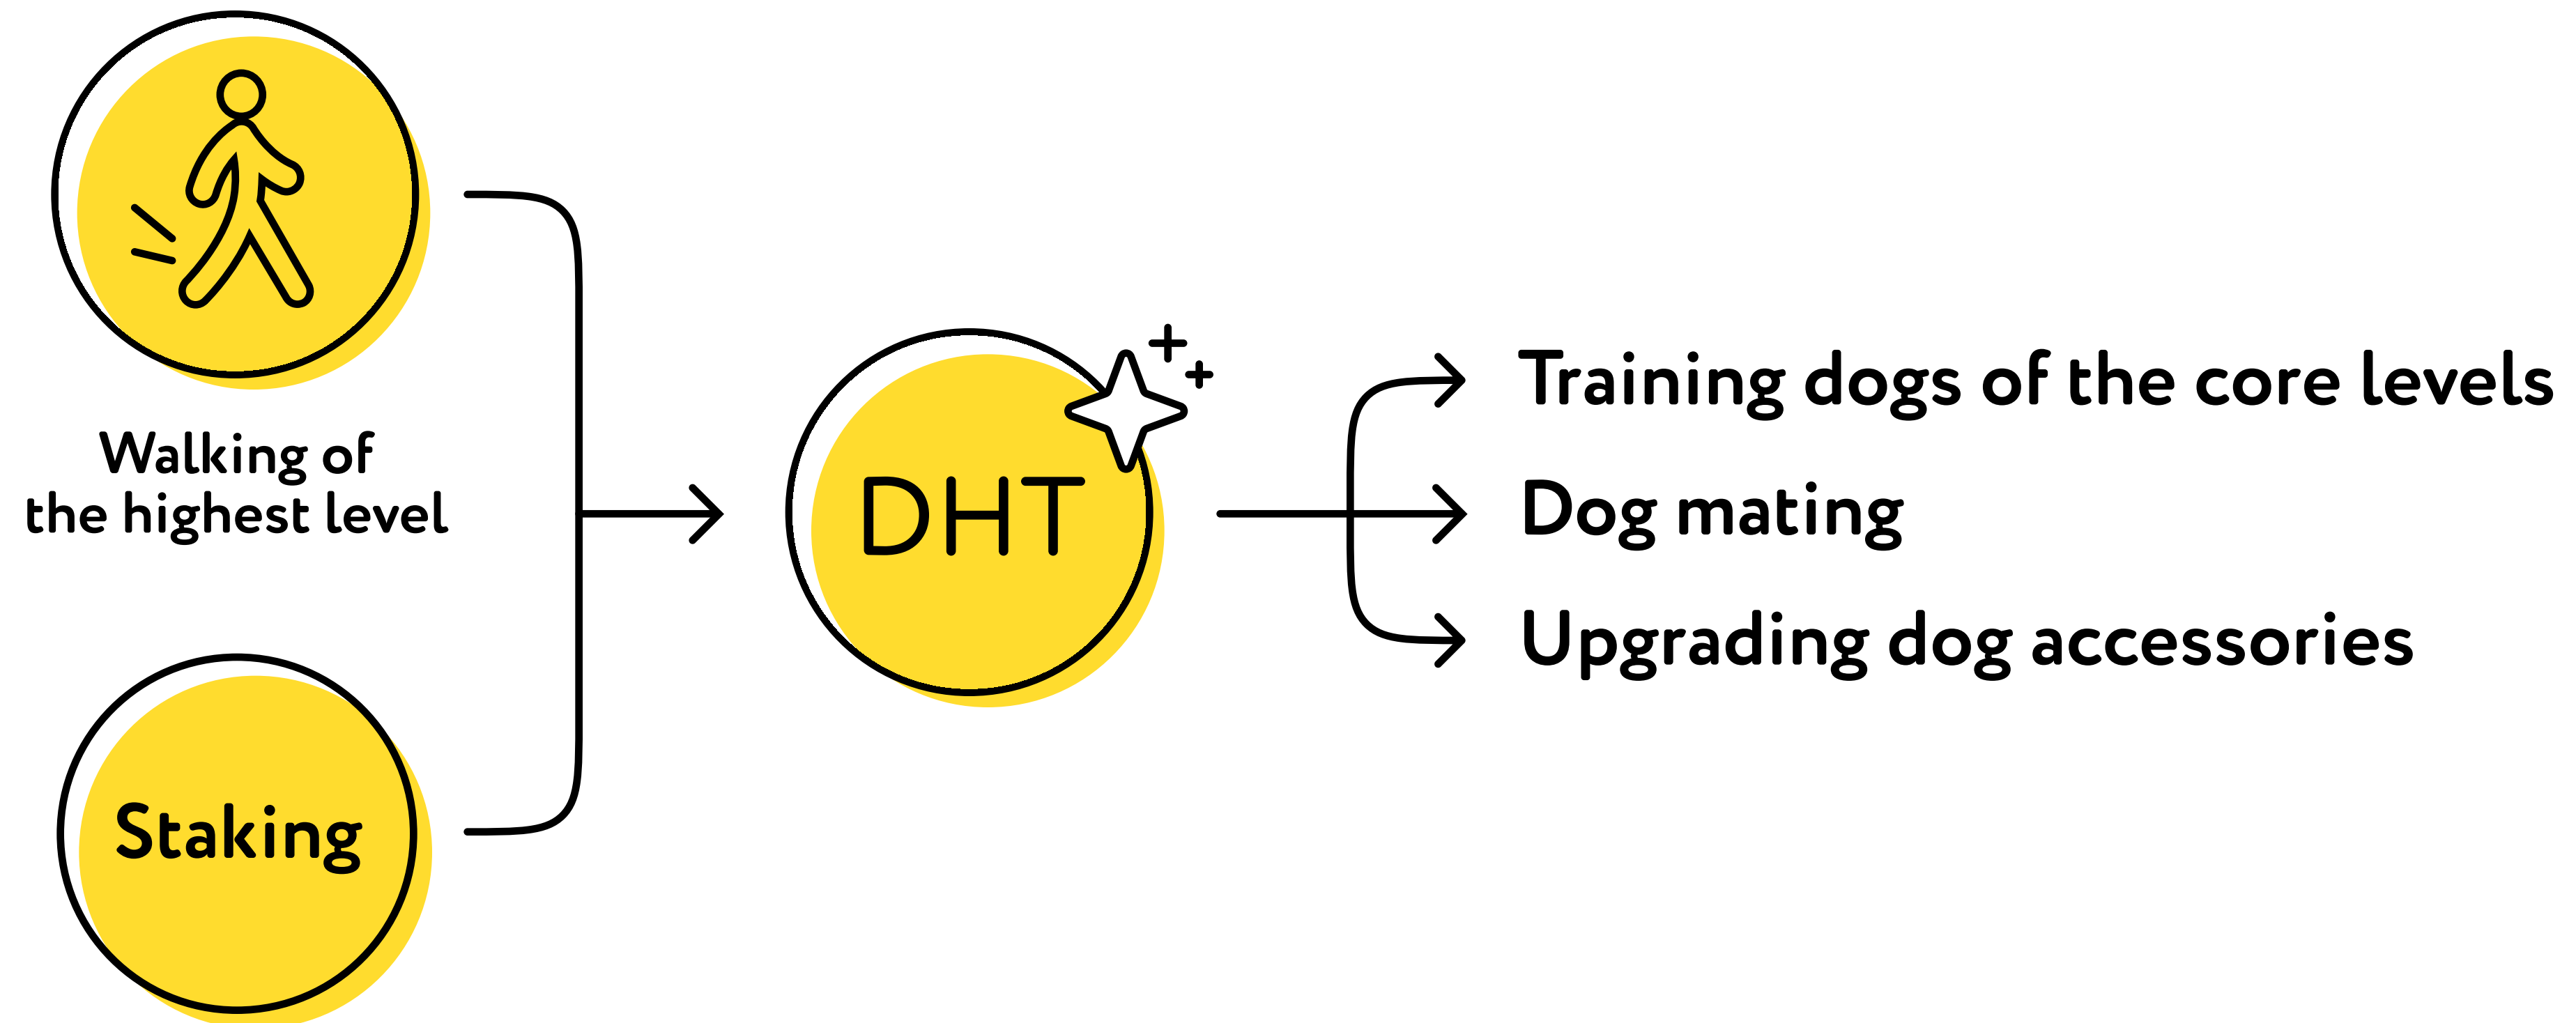

# DST TOKENOMICS

Users get DST tokens through the core mechanic – walking the dogs

# DST TOKENOMICS

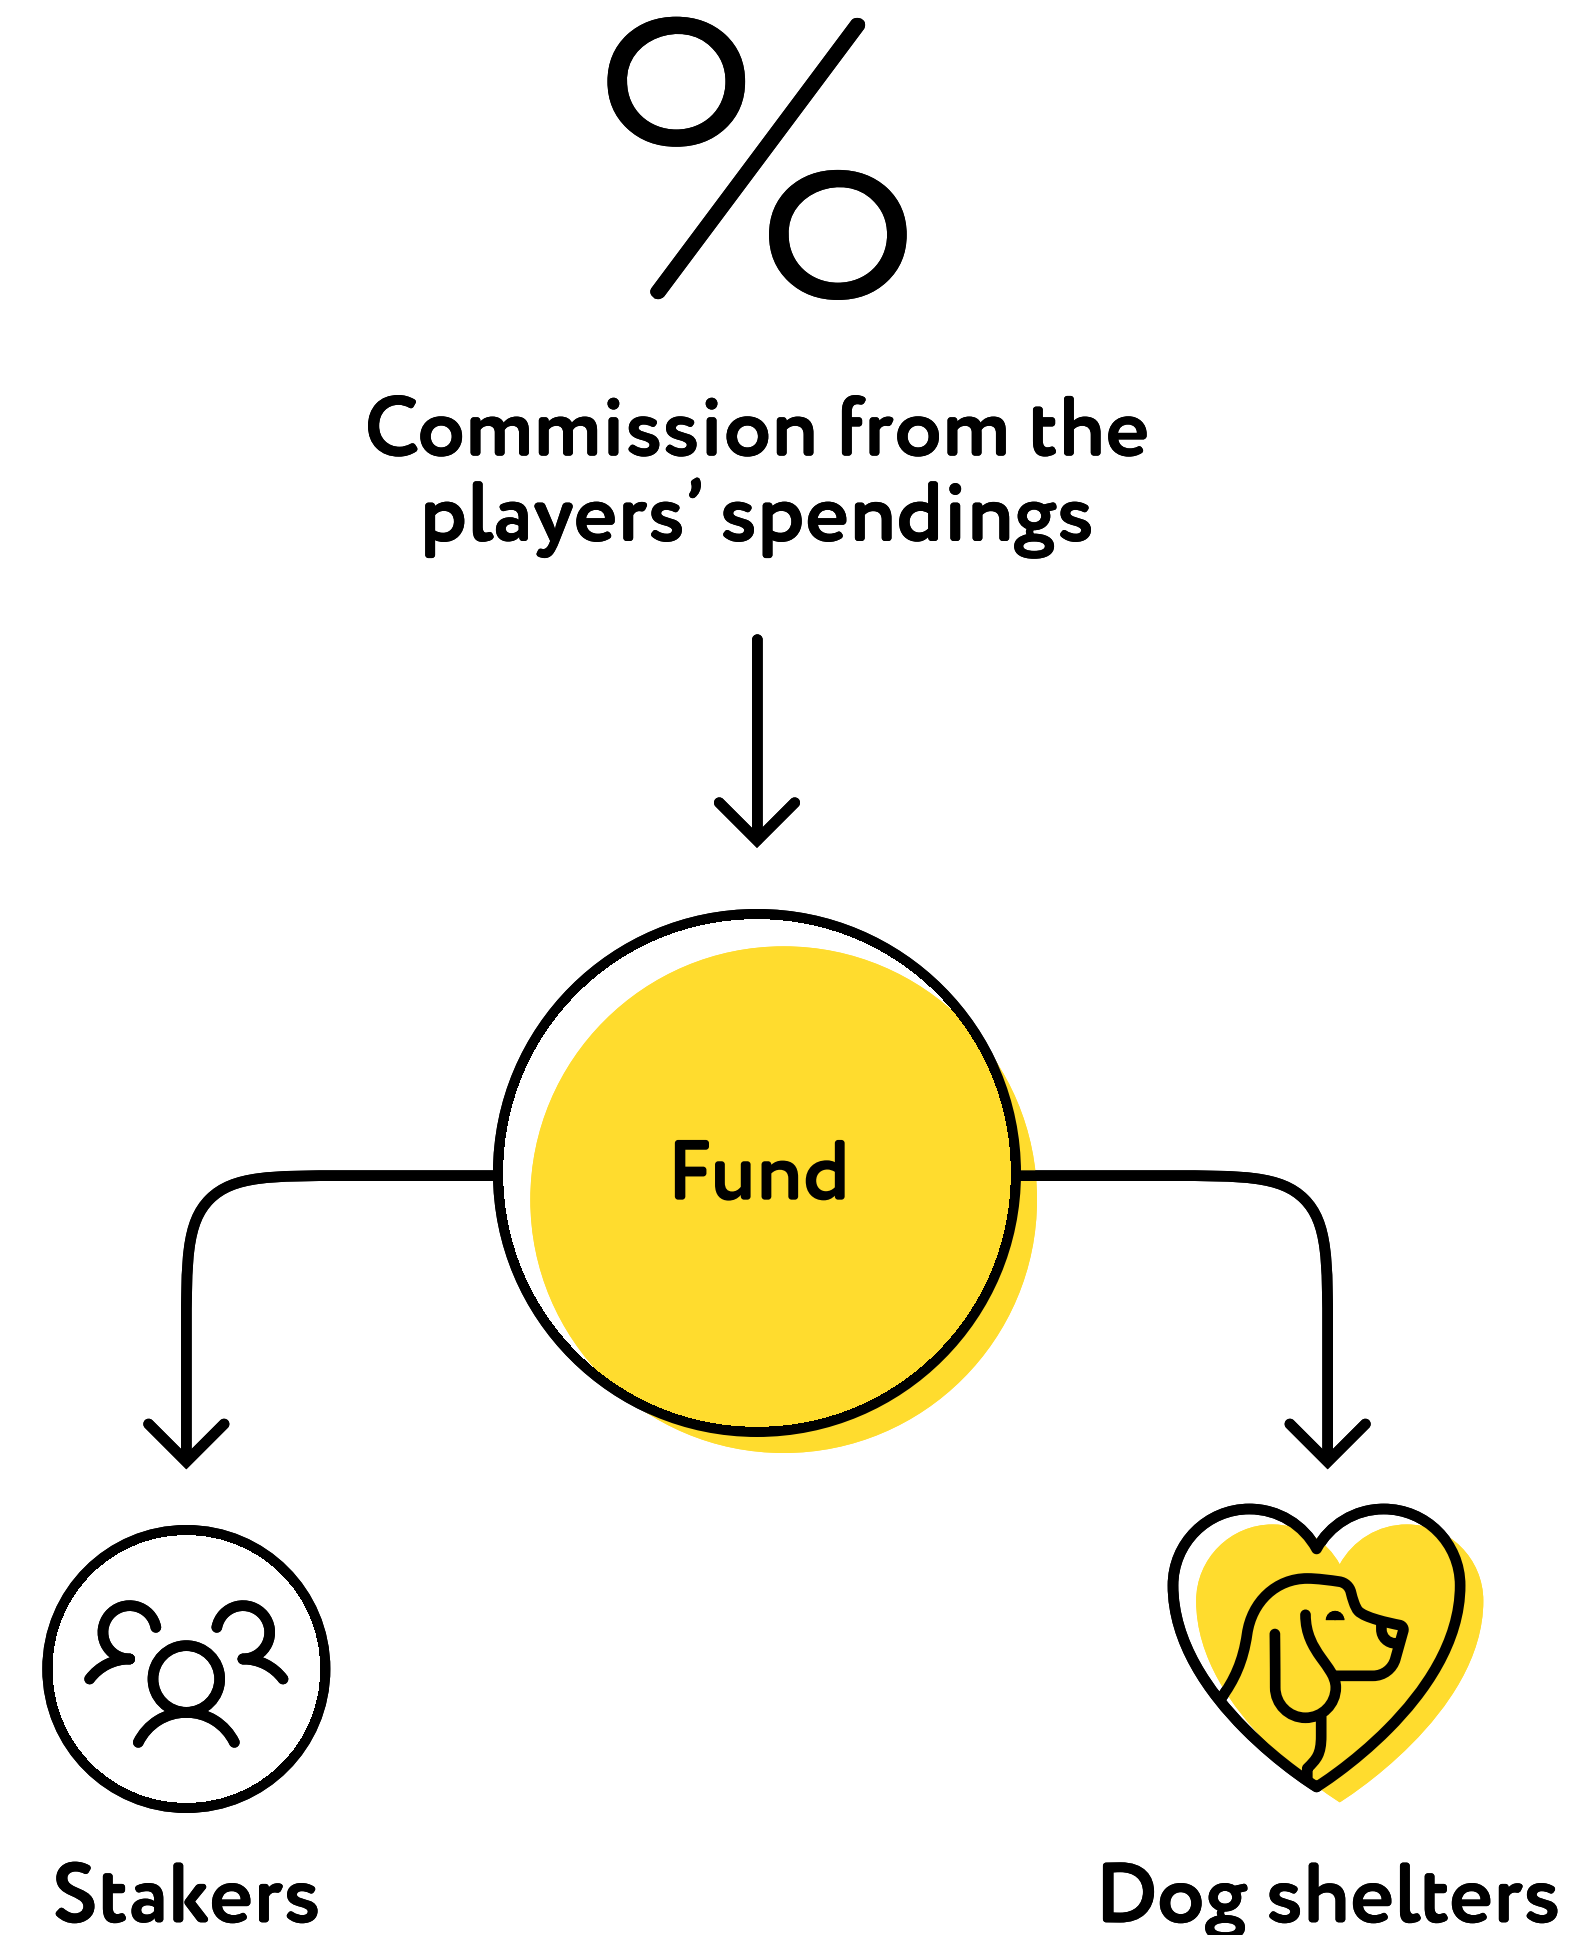

Users can earn DHT tokens by walking the dogs of the highest level and as a reward for staking

## DE-FI

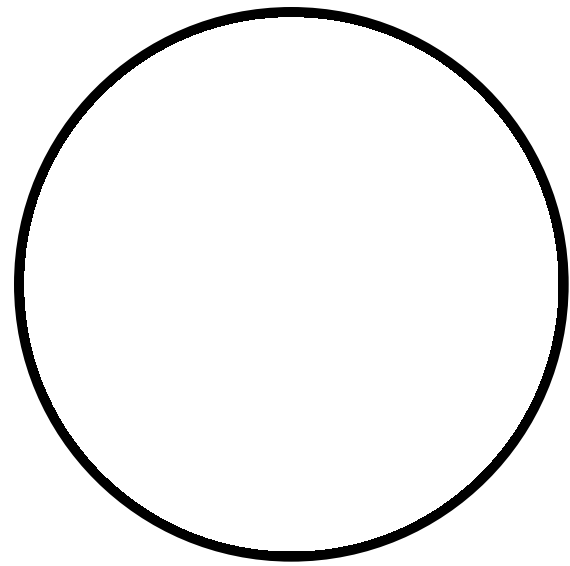

Most of the commission from all of the players' in-game DHT spendings is sent to a special fund which is distributed by the players through voting.

Based on voting results, the funds can be either divided between the stakers, or sent as a donation to dog shelters all around the world.

# TEAM

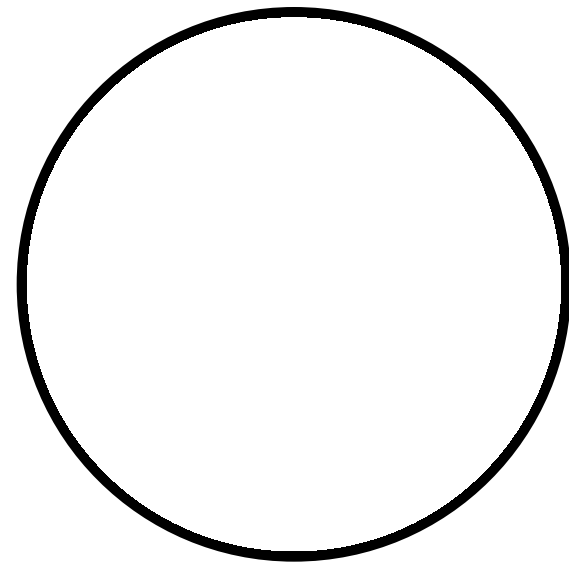

**Mikhail**
